TASKBOARD

Product Backlog	In Progress	Completed
User Story 1: As a student team, we need to transition our project scope and structure following a member's departure so that we can distribute project responsibilities efficiently.	Adjusting task ownership for the smaller group.	Polished pitch deck for Item Hive. Presentation to the WIL coordinator on July 15th.
User Story 2: Being a newly restructured team, we need to pitch the Item Hive business to our WIL coordinator to get approval for our rebranded ICT clothing idea.		

WALKTHROUGH

1. What do we need to do to advance this piece of work?	Need to receive the feedback we missed out on our presentation on the 15th. We also need to chart out the next iteration of the Item Hive brand based on our updated team capacity.
2. Is anyone working on anything that is not on the board?	No. Moving forward, all administrative updates, role shifts and research tasks related to the rebranding must be logged transparently.
3. What do we need to finish as a team?	Establish clear ownership of the remaining technical and business deliverables now that our team size has shrunk.
4. Are there any bottlenecks or blockers to the flow of work?	Lack of feedback from the pitch due to time constraints, so we don't know if the WIL coordinator has concerns about our brand. The structural change (loss of a member to an internship) temporarily disrupted our capacity, but the transition itself was smooth.

LOGBOOK

Date:	14/07/2026	
Tuesday	1. What did I complete since the last standup?	Reviewed original project scope and discussed team restructuring requirements following the departure of our group member for their internship. Collaborated on refining the Item Hive business pitch, tailoring the branding narrative specifically toward IT students.
	2. What am I planning to complete between now and the next standup?	Finalize adjustments to team roles and begin updating our slide deck for the rebranded concept, Item Hive. Double check our content for the presentation and prepare for the WIL coordinator session tomorrow.
	3. What are my impediments (or risks or problems)?	Reduced team capacity might increase the individual workload moving forward. Time constraints for the upcoming presentation slot.

Date:	15/07/2026	
Wednesday	1. What did I complete since the last standup?	Presented the Item Hive business pitch to the WIL coordinator.
	2. What am I planning to complete between now and the next standup?	Document the team's internal review of the presentation. List outstanding questions that we need answered.
	3. What are my impediments (or risks or problems)?	No immediate feedback was received after the pitch due to limited session time, leaving a gap in validation.

Date:	16/07/2026	
Thursday	1. What did I complete since the last standup?	Debriefed as a team regarding the presentation delivery and confirmed that the team restructuring was handled smoothly without internal tension.
	2. What am I planning to complete between now and the next standup?	Draft the next steps for product development and start compiling our individual Agile reflection logs.
	3. What are my impediments (or risks or problems)?	Unclear heads up on the Item Hive concept.

Date:	17/07/2026	
Friday	1. What did I complete since the last standup?	Completed the Agile process logbook, documenting the shift in team dynamics and the pivot to the rebranded business idea
	2. What am I planning to complete between now and the next standup?	Reach out to the coordinator for a brief feedback note and plan the next sprint's backlog.
	3. What are my impediments (or risks or problems)?	None currently, blocking issues are captured.

Summary of What I've Learnt:

Agile Adaptability: I have learned how to respond to change over following a rigid plan, for example when a team member left for an internship, the group successfully adjusted it's capacity and reorganized responsibilities without conflict.

Value of Feedback: Undergoing the presentation highlighted how critical immediate feedback loops are in Agile. Without stakeholder feedback, our team realized how difficult it is to confidently plan the next sprint, making practical follow-up an area for immediate improvement.

Reality of Product Pivot: Refining the pitch for Item Hive demonstrated that early stage iteration on the core product vision is a valuable, necessary use of sprint time. Ensuring that our team builds something highly targeted rather than rushing into production blindly.
